

# HUNTER SCHULTZ

## IT Technician

### CONTACT

**Phone:** (360)-358-3443 (Mobile)

**Email:** HiSchultz05@gmail.com

### SKILLS & TOOLS

#### Network Infrastructure & Compliance

- Maintenance, optimization, and readiness of critical radar and surveillance infrastructure
- Structured cabling, hardware replacements, and routing/switching troubleshooting per NEC compliance
- QA validation, device configurations, and pre-production testing on network systems
- System hardening, patch management, and cross-functional risk identification

#### Tools & Diagnostic Equipment

- Fluke testers, multimeters, and oscilloscopes for live/non-live systems
- Remote support tools and PSA/RMM familiarity
- AV and conferencing equipment exposure

#### Networking Fundamentals

- Basic network connectivity troubleshooting
- DHCP, DNS, and IP addressing concepts
- Wired and wireless connectivity diagnostics, access points, and switch installation

### CAREER OBJECTIVE

Results-driven technical professional with hands-on experience in critical infrastructure maintenance, advanced hardware diagnostics, and secure systems management. Proven capability in maintaining high-reliability national airspace infrastructure, executing complex hardware troubleshooting with specialized diagnostic tools, and adhering to strict compliance and documentation standards.

Seeking to leverage extensive technical precision, network compliance expertise, and rigorous asset tracking within an advanced technical environment.

### WORK EXPERIENCE

**ATSS**, Federal Aviation Administration, 05/2026 – Current

Full-Time, 40 Hrs a week

- Maintain operational readiness of critical radar and surveillance infrastructure for air traffic control.
- Isolate system faults using specialized diagnostic tools including Fluke testers, multimeters, and oscilloscopes.
- Execute structured cabling, hardware replacements, and routing/switching troubleshooting per NEC compliance.
- Perform quality assurance validation and pre-production testing to eliminate downtime.
- Maintain technical documentation, asset records, and compliance logs for high-security network installations.
- Coordinate with engineering teams to execute system hardening and patch management updates.

PC Deployment & Maintenance

- New PC setup, imaging, OS reinstallations, and upgrades
- Windows 10 to Windows 11 migrations
- BIOS/UEFI configuration, EFI repair, drive replacement, and cloning
- Asset tagging, inventory tracking, and lifecycle documentation

Operating Systems & Applications

- Windows-based operating systems
- Microsoft Office and standard business applications
- Malware remediation, system recovery, and registry troubleshooting

End-User & Desktop Support

- Tier 1–2 on-site and remote technical support
- Hardware, software, printing, login, email, and peripheral support
- Customer-focused issue resolution, ticketing systems, and technical documentation

CERTIFICATIONS,  
BADGES, & LICENSES

- Microsoft Security Essentials Professional (Certification)
- Ubuntu Linux Professional (Certification)
- Linux Essentials (Badge)
- Microsoft Azure AI Essentials Professional (Certification)

DCO Technician, Amazon Web Services, 12/2025 – 05/2026  
Full-Time, 40 Hrs a week

- Performed hardware installation, configuration, and diagnostics in a large-scale enterprise environment.
- Troubleshoot system and connectivity issues using structured, documented processes and maintained accurate asset records.

IT Intern, Sundown M Ranch, 07/2025 – 12/2025  
Full-Time, 45 Hrs a Week

- Provided front-line IT support in a HIPAA-regulated environment using Fluke testers and diagnostics tools.
- Installed and maintained Windows PCs, printers, and peripherals; executed OS upgrades and drive replacements.

ITCS Safety Officer, Perry Technical Institute Campus Safety Committee, 02/2025 – 07/2025  
Part-Time, 20 Hrs a Week

- Coordinated safety compliance for IT labs, documented issues, and tracked corrective actions with leadership. .

District-Wide IT Intern, Grandview School District, 03/2024 – 07/2024  
Part-Time, 6 Hrs a Week

- Supported desktop computing environments, deployed and repaired 50+ PCs, and assisted with network troubleshooting.

EDUCATION

Associate of Applied Science, Information Technology & Communication Systems  
  
Perry Technical Institute – 12/2025
